

June 27, 2005

In December 2003, Vetpreneur, LLC was incorporated in Virginia as Vetpreneur, LLC. The company is organized and focused as a comprehensive IT and telecom-munications support services partner to its Government and Commercial sector clients; providing, unique products and services for specialized information assurance and homeland security. Vetpreneur has extensive capabilities in providing IT/Telecommunications products and services.

Vetpreneur provides the highest quality business and technical products and services that will enable our customers to survive and grow in a highly competitive and constantly changing technical environment. This is accomplished by identifying potential problems, designing quality systems that will solve the problems, and making them readily available for purchase. We constantly seek to maximize opportunities for cost savings, and establish complementary working relationships with other businesses to maximize end-user satisfaction.

Vetpreneur is organized in four IT professional service divisions. The **Information Development and Storage Management Division** provides consultants to assist clients in resolving current and growing industry information storage access, compliance, and cost management situations. The **Business and Performance Management Division** provides business development, proposal management, recruiting and placement support services. The **Network Infrastructure Technical Consulting Division** provides technical consulting such as network design, development and implementation support. This division's client support also includes network maintenance, network performance efficiency, and improvements to achieve network operational cost reductions. High quality services in the area of systems integration, programming, programming support and system analysis are available through the **Information Technology Support Division**.

Mr. Bob Hesser, CEO / President, Vetpreneur, LLC

Mr. Hesser has over 40 years in the IT industry beginning when he joined the U. S. Navy in 1963. He received his first introduction to computers in 1964 learning programming and developing automated administrative systems. During his 21 years of service, Bob gained extensive knowledge of the IT industry. He helped establish an “A” School in Pensacola, Florida in 1970 where he taught for three years. He was selected Shore Sailor of the Year for the Naval Training Command and the Associate Degree Completion Program. After tours in Japan and San Diego he received his Computer Information Systems MBA in 1982. On May 1, 1984, he was transferred to the Disability Retired List as a Master Chief

Cryptologic Technician (E-9).

He spent the next six-years with Supervisor of Shipbuilding (SUPSHIP) San Diego, Naval Sea Systems Command (NAVSEASYSCOM) as IT Manager, ADP Security Officer, and ADP Acquisition Authority. While there, his most significant contribution was his efforts and leadership in the nation-wide automation of sixteen SUPSHIP commands through a NAVSEASYSCOM competitive procurement. In 1984, Bob began his active support of individuals with disabilities and assisted them in finding employment within the federal government. In 1991 and 1992 he worked with the Agricultural Marketing Service, where he was responsible for automating 129 nation wide locations by replacing a minicomputer system with the first Frame Relay microcomputer Wide Area Network under FTS2000. Because of his previous work with disabled persons, he was selected to represent USDA on several federal committees for identifying accommodations for the disabled and agency compliance with the American Disability Act (ADA). In 1993, as a GM-15, Bob left the government.

He formed HI Tech Services Incorporated (HITS) to provide consulting services to business and government with a strong focus on assisting Small Disadvantaged Business. For six-years, Bob managed all federal efforts at Dynamic Decisions, Inc. (DDI); an 8(a). Total sales revenue was \$219,500,000. In October 1998, Bob began working exclusively for HITS. **HI Tech Services Incorporated (HITS)** was organized and focused as a comprehensive IT support product and services partner to its Government and Commercial sector clients; providing, unique products and services for specialized court systems and information assurance. Bob is an active member of the national Task Force for Veteran’s Entrepreneurship. On May 5, 2004, he was awarded the 2004 SBA Veteran Small Business Advocate for the Washington DC District.

Bob began Vetpreneur, LLC for the purpose of moving from marketing products to providing services within the information technology and telecommunications professions. Vetpreneur partners with and also provides specialized business management services to large and small government contractors. Vetpreneur business management team has supported a number of clients in the development, implementation, and accomplishment of their business acquisition objectives. Most recently, Vetpreneur proposal development services were provided to ISI, Inc. for their major GSA Veteran’s Government-Wide Acquisition Contract (VETS GWAC) procurement response.

Vetpreneur is a SDVOB.
